

**Policy****Descriptor Code: BBI****Board-Staff Relations**

Board members are encouraged to seek information from the Superintendent of Schools as it relates to the operational function of the school district. If the information requested requires a visit to a school or contact with a staff member, the Superintendent or his/her designee will arrange the collection of information and/or visit to a school site.

Board members are to communicate with the Superintendent what specific aspect (s) of the school system they would like to acquire additional information about as it relates to the operational function of the school district.

The visit will result in the board member (s) touring a district school (s) and gaining greater insight related to operations of the school district with the explicit intent to better inform pending or future governance decisions.
